1 Cyclotron Road, Mail Stop 84R0171, Berkeley, CA 94720

EDUCATION

Massachusetts Institute of Technology

February 2013

PhD in Hydrology

University of Connecticut, Storrs

June 2002

B.S.E. in Civil and Environmental & Engineering

EXPERIENCE

Lawrence Berkeley National Laboratory - Earth Science Division - Climate and Carbon Sciences

May 2013 - Present

Postdoctoral Fellow

Research on the development and implementation of next-generation terrestrial biosphere dynamics and biophysics in land modeling systems.

Sustainability Science Program at Harvard Kennedy Schools Mossavar-Rahmani Center for Business and Government

January 2013 - May 2013

Postdoctoral Researcher

Research Project: “Sustainable Development of the Amazon and its Surrounding Regions: The Interplay of Changing Climate, Hydrology, and Land Use”. Development of environmental modeling software, pertaining to the physical consistencies of cloud radiation scattering and general handling of model memory.

Massachusetts Institute of Technology

September 2004 - October 2012

Research Assistant

Cambridge, MA

- Thesis research: Knox, R.G. *Land Conversion in Amazonia and Northern South America; Influences on Regional Hydrology and Ecosystem Response*. Dissertation, Massachusetts Institute of Technology. Cambridge, 2012.

TECHNICAL STRENGTHS

Co-lead Developer	Ecosystem Demography Model 2.1 and 2.2 (ED2)
Lead Manager	ED2 Community Code Repository and Version Control (github)
Terrestrial Ecosystem Biophysics	Parametrization of terrestrial heat and mass transfer, integration techniques, radiative transfer in plant canopies Parallelization and numerical optimization techniques, vectorization, procedural optimization, input/output, memory handling
High Performance Computing	C, Fortran 90, Matlab/Octave, OpenGL, Visual Basic Message Passing Interface (MPI), Hierarchical Data Format (HDF), Network Common Data Format (NetCDF), OpenMP
Computer Languages	C, Fortran 90, Matlab/Octave, OpenGL, Visual Basic
Protocols & APIs	Message Passing Interface (MPI), Hierarchical Data Format (HDF), Network Common Data Format (NetCDF), OpenMP
Sensor Technology	Campbell data loggers, sensor system design, eddy covariance, heat flux plates, radiation sensors, dielectric soil moisture probes
Visualization Techniques	Designer, Ecosystem Demography Display Interface (EDDI)
Server Administration	Distributed HPC Linux computer clusters
Information Systems Processing	Techniques in: Satellite Retrieval Spectral Correction Geospatial Mosaicing Classification Filtering MODIS,Landsat,SRTM,TRMM,etc

AWARDS AND AFFILIATIONS

Member, Chi Epsilon National Civil Engineering Honor Society

Recipient, American Geophysical Union Outstanding Student Paper Award, 2003 Joint Assembly

Recipient, Presidential Fellow, Massachusetts Institute of Technology, 2004-2005
